

## How to Access Digital Audiobooks with the Catalyst Digital App

1. Download the Catalyst Digital app to your iOS or Android tablet device.
2. Click on the app to launch it.
3. Click on Accounts and + and then enter the Prairie Point username (point) and password (library).
4. Browse or search for an audiobook. Click on the title that you would like to check out.
5. In the popup window for that title, click on the yellow Check Out a Copy button. The audiobook will download to the device. A line will appear under the title in the list window. This means that the book is downloaded on the device.
6. Click the yellow Listen Now button to begin listening to the book. When you are completely finished with the book, click Return to return the book to the library so that others may check it out. On the due date, the book will automatically return to the catalog.
7. If you need to take a break from listening, click the pause button. When you return, the story will start where you left off.
8. These functions are also available to you in the Catalyst Digital app:
  - Details button will return you to the Description page for the book. From there you have the option to return the book or listen.
  - Chapters button will take you to a list of the Table of Contents for the book. Click on any chapter to jump to that chapter in the recording.
  - Add Bookmark button to insert a bookmark at that point of the story.
  - Bookmarks button will show all your previously added bookmarks.
  - Notes will allow you to add a note to the recording and to review notes that you have already added.
  - Now Playing will take you to the book you have been listening to and you can start where you left off.
  - Clock with Zzzz - click this icon to turn on the sleep function. You can fall asleep listening to the book.
  - Click Speedometer to speed up or slow down the playback. This will allow you to listen to the book more quickly or slow it down to a pace where you can read along.
