

How to Access Follett eBooks with the Follett Digital Reader App

1. Download the Follett Digital Reader app to your iOS or Android tablet device. If you have an Android device, you will also need to download the free Adobe Air app.
2. Launch the app. A page like the one on the right will appear. In the http:// box enter wbb12215. Your username and password are the same as your standard Prairie username (NOT your whole email address) and password.
3. Click login. You will see a screen like the one below.
4. Click Check out more eBooks. You will be taken to a browser window.

5. Sign in again using your Prairie username and password.
6. A Follett Shelf window will appear. Search or browse for a book that you would like to check out. Note that you can narrow down the options by availability, author, subject, genre, lexile, series, publication year, length (extent) or language. (see image on right)

7. Click twice on the cover of a book you would like to start reading. Turn the page by swiping across the screen or clicking on the right arrow at the bottom.
8. Once you have found a book you would like to checkout, click the Checkout button. The book is now checked out to you.
9. Return to the Follett Reader app. You will see the title you just checked out under My Online Books. You can read the book from there whenever you are connected to the Internet. Note that while the book is online, the note and highlighting features will work. Every time you check out that book, your notes and highlights will be maintained.
10. To download the book, click the Download button. Books that have been downloaded can be read anytime, even when your device is NOT connected to the Internet. When the book is downloaded, the note and highlight features do not work.
11. To close a book you are reading, click on the backpack icon. A popup window will open asking if you would like to return the book early or keep it. If you are finished with the book, return it early so that it will be available for others to checkout. On the due date, books will disappear from the Follett Digital Reader app.
12. If you are using a school iPad, be sure to logout of the Follett Digital Reader app and the Follett Shelf in the browser. Logout from the app by clicking on the person icon in the top right and then selecting Logout. Logout from the browser by clicking on the person icon or the 3 lines in the upper right corner. Choose logout.
